This is the first part of Stairway (the part every one plays) and the part played over the verses. I have liked (and used) this song because, if played correctly, it teaches the basic concept that the thumb play the top three strings while the 1st finger plays the G string, 2nd finger plays the B string and the 3rd plays the E string. It is also a good lesson in Arpeggios and good song writing and arranging. Be aware as you play this how the chords build off each other and develop.
